STAT [redacted] has Original

Info cy to [redacted]

[redacted] STAT

You'll note the internal deadline of 20 April established by [redacted] STAT

AT To: [redacted] Frim: [redacted] 4 Apr 74

I have explained to [redacted] that there is no way to dream about any response by 1 May on this matter. We are putting this into our work program; but it is an inter-agency task and of large magnitude. With our present sized staff we can hardly consider it at all; we will discuss it at an IHC meeting and see how we can get the community to help. However, before we dash off on this, we need to get guidance from the community as to what really needs to be done. I am not going to create a paper mill that is not used. We will be able to report orderly progress, and some parts can be done earlier than others, but overall this is something like a several months project. Forget your suspense action on this.

74-1176

1 April 1974

MEMORANDUM FOR: Acting Chairman, USIB Information Handling Committee

SUBJECT : Inventory of Community Information Handling Systems (CIHS)

1. This is to request that the IHC undertake an updating of the CIHS Inventory. It would be useful if the Committee were to (1) define terms (network, system, data base, file, etc.) and interrelationships which exist among defined terms; (2) provide block diagrams of inventory entities, as appropriate; (3) include descriptions of network communications capabilities, i.e., bandwidth, modulation, frequency, etc.; (4) determine whether more useful system-type descriptions are feasible. If you convene the IHC, I would like to discuss this request with the members.

2. I recommend that the Committee consider whether annual updating of the CIHS Inventory is adequate vice the current semi-annual requirement. I would appreciate the results by 1 May.
